Web Site Hosting Information Sheet: ***yourdomain.com***

DOMAIN / ACCOUNT

The Username and Password listed is used to access many services and features that require authentication, including your Control Panel, the "catch-all" email account, FrontPage and FTP access.

Username / Password: ***username*** (first 8 letters of domain name) ***password***

CONTROL PANEL

The Web Control Panel Utility allows you to manage your account through your web browser. You can get web site statistics, set up additional email accounts or forwards, check your logs, and much more.

Your Control Panel: ***http://www.yourdomain.com/cpanel/***

EMAIL

All email sent to your domain will be forwarded to this account until you setup mailboxes using your Control Panel.

Email Account / Password: ***username*** ***password***

Email POP Server (incoming): ***mail.yourdomain.com***

Email SMTP Server (outgoing): ***mail.yourdomain.com*** (Requires Authentication)

NAME SERVERS (DNS)

If it has not been done, you must change the DNS servers (also called Name Servers) that are associated with your domain. Your domain registrar (who you bought the domain from, often Network Solutions) will have an on-line utility to change your DNS. For Network Solutions go to *www.netsol.com* and click on *Account Manager*. Your NEW DNS information is listed below and will take effect within 24 hours after changing it. To check your domain DNS information, go to "*www.netsol.com*" and click on *WHOIS*.

Primary DNS Hostname / IP: ***NS7.DNSPROTECT.COM*** ***139.81.52.173***

Secondary DNS Hostname / IP: ***NS8.DNSPROTECT.COM*** ***139.81.52.215***

FTP

Upon connecting with an FTP client, you will see a list of the following directories:

<i>/www</i>	This is where your site files will go **IMPORTANT**
<i>/public_html</i>	Same as the www folder
<i>/tmp</i>	This directory holds your access log files
<i>/mail</i>	Mail area for your domain (no need to touch this!)
<i>/public_ftp</i>	Files for your anonymous FTP
